🪪 Profile

As a **Telecommunications Engineering graduate**, I've transitioned into **Front-End Development** with a passion for creating user-friendly and visually engaging web interfaces. I specialize in building responsive and high-performance websites, transforming designs into functional, interactive experiences using technologies such as **React, JavaScript, and Tailwind CSS**. I am constantly exploring new trends in web development and always strive to enhance my skills. With a strong foundation in both front-end development and UI/UX principles, I enjoy collaborating with teams to build seamless, innovative digital .

🎓 Education

Electronics and Communication Engineering   2017 – 2024
                                                                 Damascus, Syria

🧠 Skills

Front-End Technologies
- HTML, CSS, JavaScript
- React (JSX, Hooks, Components)
- Next.js
- TypeScript
- Tailwind CSS, BootStrap
- TanStack Query (React Query)
- Framer Motion
- Responsive Design: Optimized layouts across all screen sizes and devices

UI/UX Design
- Figma
- Ability to translate designs into clean, semantic front-end code

Tools & Platforms
- Git, GitHub, GitLab
- Firebase (Authentication, Cart Management)
- Strapi
- Axios, EmailJS, Shadcn/UI, Radix-UI

Soft Skills
- Problem-Solving and Analytical Thinking
- Excellent Communication and Collaboration
- Strong Attention to Detail
- Ability to Work in Dynamic, Fast-Paced Environments

💼 Professional Experience

Freelance Front-End Developer 2023
Self-employed Damascus, Syria
Built different freelance front-end projects using **React**,
Next.js, and **Tailwind CSS** with good performance and
responsive design.
Created **custom admin dashboards** and **e-commerce
websites** for clients based on their design and feature needs.
Worked **online** or **on-site** with clients and teams to turn design
ideas into real working websites.

📂 Projects

Ecommerce website 2023 – 2024
My graduation project
Design and Implementation of a Contemporary Website for
an E-commerce Platform - A Case Study on Apparel
Sales.**Developed** and **designed** a modern e-commerce
platform for clothing using **Next.js**, **Tailwind CSS**, and
TypeScript. The backend was implemented with **Strapi**,
providing a robust and scalable content management
system. The platform offers a seamless user experience
with a custom, responsive design.

0ODnYbC/view?usp=sharing ⬈

portfolio 2024
An interactive personal portfolio designed and developed
using React, with features like seamless navigation between
sections using React Router, interactive slideshow using
Swiper, and an efficient contact form via EmailJS, with a
responsive design that fits all devices.

Admin Dashboard for Haunha 2025
Freelance Project – IX Coders
Developed a custom admin dashboard for Haunha using
Next.js (client & server rendering) and **Material UI**, based on
the **Vuexy** Admin Template.
Customized and extended the template to meet specific
operational and branding requirements

Integrated secure authentication using **NextAuth** and backend connectivity via **Prisma**

Added rich features including rich text editing **(Tiptap)**, dynamic charts **(ApexCharts)**, calendar integration **(FullCalendar)**, and interactive maps **(Mapbox GL)**

Delivered fully responsive layouts and optimized performance for internal company use.

MJ Restaurant Website   2025

Modern and responsive restaurant website with menu, booking, and animations.

MJ Restaurant is a modern and easy-to-use restaurant website made with **Next.js 15**, **React 19**, **Tailwind CSS**, and **Radix UI**. It has menu sections for Breakfast, Grilled, and Drinks, smooth animations with **Framer Motion**, and an easy table booking form using **React Hook Form** and **React DatePicker**. The site works fast on phones and computers, giving customers a simple and enjoyable experience.

Ecommerce website   2025

This project is developed using **React** to create an interactive and seamless user interface, and **Tailwind CSS** for designing clean and responsive layouts across all devices. It integrates **Firebase** for managing user authentication and cart functionality, allowing easy and secure login and product addition to the cart. The project features a **responsive design** that supports both **Light Mode and Dark Mode**, offering users the ability to switch between the two based on their preferences. It provides an enjoyable and user-friendly shopping experience with a flexible and modern interface.

Portfolio 2025

Personal portfolio for my work

Developed a modern, **responsive** portfolio website using **React** and **Tailwind CSS**. Features include an integrated contact form with **EmailJS**, performance optimization via lazy loading, interactive animations using **Framer Motion** and **tsParticles**, and a fully functional **Dark/Light** mode toggle. Leveraged a range of modern libraries to deliver a smooth and visually appealing user experience across all devices.
